linkedin.com/in/jordipoblet

Product designer who builds. Ten years designing digital products, fifteen designing in general, starting from industrial design. Lead Product Designer at Veriff, and previously founding designer at Rillet, where the product, brand and design system I created from zero carried the company from no clients to a $1B valuation.

I design in code as much as in Figma, and ship my own products end to end with AI, from the idea to the launch.

Experience 05

Oct 2024 – Present

Veriff
Remote · Barcelona

Lead Product Designer

- Lead design on **Workflows**, a no-code builder that lets clients design their own identity verification flows (conditions, screens, branches, outcomes) instead of waiting for Veriff engineers to build them by hand.
- Turned complex logic into a set of configurable blocks that snap together: fewer possibilities, much more power. First releases are testing very positively with clients.
- Previously led design for **Expansion**, the vertical researching and testing products Veriff didn't have yet: KYB, unstructured documents and emerging technologies.

Nov 2021 – Aug 2024

Rillet
Remote · Barcelona

Senior Product Designer · Founding designer, employee #6

- Designed the product, logo, brand, dashboards and design system of an accounting platform from zero: contract builder with revenue recognition, automated journal entries, reporting and first AI features.
- Proposed and sold to the CEO and CTO a pause on new features to rebuild the front end around a single UI vision. That foundation is what the platform scaled on.
- Sole designer for up to nine engineers: became design reviewer and system maintainer, so engineers built straight from the system and complex features shipped without a design bottleneck or debt.
- **0 → 40+ clients and $0.5M ARR.** The brand and platform stayed almost unchanged through Series A, B and C (~$208M raised, $1B valuation). Hired and managed a second designer.

Apr 2020 – Nov 2021

Glovo
Remote · Barcelona

Product Designer · Courier app, iOS & Android

- Led the research and redesign of the delivery flow, the core of the courier app. Mapped every order type into one concept: take the courier from A to B, one clear task at a time. Validated and carried forward, it reduced delivery times considerably.
- Designed and led a mentorship programme for junior designers; both were hired full-time.

Nov 2018 – Apr 2019

Isobar · Dentsu Creative
Melbourne

UI Designer (Contractor)

UI and strategic work in a fast-paced agency for Bridgestone, Jetstar and the Australian Gas Network.

Nov 2016 – Aug 2018

Tigerspike (now Concentrix Catalyst)
Melbourne

Contractor → Associate → UX/UI Designer

Grew from a one-week contract to a full-time mid-weight role. UX and UI for product and e-commerce clients, then a dedicated pod building a government digital product from the ground up.

Own products 04

Designed and built end to end, from idea to launch, in my own time.

01 AthleteID 2026

One athlete profile for entering sports competitions: a browser extension fills race registration forms, and races offering Register with AthleteID take your details in one click.

athleteid.pro ↗

02 What The Flag 2026

A native iOS game in SwiftUI: every flag starts blank and you colour it in, section by section. No accounts, no personal data collected.

whattheflag.co ↗

03 Legend Numbers 2026

A Chrome extension that spots shirt numbers on any website and, on hover, shows the sporting legends who wore them, without ever changing the page.

Other design work 02

Brand & web 2020 - 2026	Naming, logos, brand identities and websites for the **World Green Infrastructure Congress 2026**, **Inverse** (on-chain crypto), **Sottobosco** (artists' residence) and **Okasewa**, a ranch in Namibia I lived and worked on.
Before digital 2011 - 2016	Industrial and brand design in Melbourne: furniture at Tubeworks Furniture, and visual identities for local brands such as North East Coffee and Naked Espresso.

Education 03

2016	**Tractor Design School** UX Design	Melbourne
2009 - 2011	**ELISAVA School of Design and Engineering** Degree, Product Design	Barcelona
2006 - 2009	**ELISAVA School of Design and Engineering** BA, Engineering in Industrial Design	Barcelona

Skills & languages 04

Design	Product strategy, user research, UX, UI, prototyping, design systems, design review, branding. Figma, FigJam.
Build	React, Next.js, SwiftUI, Vercel, GitHub, AI coding agents (Claude Code).
Leadership	Mentoring juniors, hiring and managing designers, leading without managing: setting direction and raising the bar through systems and reviews.
Languages	Catalan Native · Spanish Native · English Native · Italian Professional

Outside work 03

- Represented Australia at four Roller Hockey World Championships, and coached players in Melbourne.
- Travelled overland from Ethiopia to Cape Town over five months.
- Half marathons at 5 min/km, surfing, and spotting wildlife wherever I travel.
